Case selection - definition of Case selection by The Free ...

Cases are more or less representative of some broader phenomenon and, on that score, may be considered better or worse subjects for intensive analysis. The article then draws attention to two ambiguities in case-selection strategies in case-study research. The first concerns the admixture of several case-selection strategies.

Case Selection for Case-Study Analysis: Qualitative and ...

The case selection procedures considered focus on typical, diverse, extreme, deviant, influential, most similar, and most different cases. For each case selection procedure, quantitative approaches are discussed that meet the goals of the approach, while still requiring information that can reasonably be gathered for a large number of cases.

The US Supreme Court chooses its cases selectively. While more than 7000 cases are brought before it for review each year, the court only chooses and decides less than 100 that it considers important.

How does Supreme Court select its cases for hearing?

Such random selection of cases will help the external validity of the study, while experimental controls and random assignment of cases will generate internal validity. Whether we choose cases randomly or deliberately, we are concerned about generating a biased sample. Some types of bias originate with the researcher.

» Case Selection - SSRMC

In a case-control study selection bias occurs when subjects for the "control" group are not truly representative of the population that produced the cases. Remember that in a case-control study the controls are used to estimate the exposure distribution (i.e., the proportion having the exposure) in the population from which the cases arose.

Selection Bias

Selection of case studies The selection of case studies was made on the basis of the extensive collection of information performed by the consortium as the first step of the project. methods of group decision-making were applied.
