hardened and precision ground, providing optimal press brake performance. All critical tolerances are ground to within 0.0008" (.02 mm). AMADA precision performance helps eliminate secondary handling to correct errors while also helping to decrease bending costs.

Press Brake Tooling | AMADA AMERICA

The EG 6013 AR bending cell (a servo-electric press brake) uses the world's first dual servo-electric drive - allowing for high speed and high precision. Combined with a bending robot, the EG AR bends small parts, eliminating the need for human operation and reducing the risk of danger when dealing with small, difficult-to-handle parts.
