A study has estimated the effect of changes in interest rates and consumer confidence on the demand for money to be: $\ln M = 14.666 + .021 \ln C - 0.036 \ln r$, where M denotes real money balances, C is an index of consumer confidence, and r is the interest rate paid on bank deposits. Based on this study we know that the interest elasticity is: a ...

Offered by Columbia University. The last three or four decades have seen a remarkable evolution in the institutions that comprise the modern monetary system. The financial crisis of 2007-2009 is a wakeup call that we need a similar evolution in the analytical apparatus and theories that we use to understand that system. Produced and sponsored by the Institute for New Economic Thinking, this ...
