Pavement Surface Evaluation and Rating (PASER) • Visual inspection system • Rates pavement surface on a scale of 1-10 • Published by The Transportation Information Center, University of Wisconsin. • Based in part on a roadway management system originally developed by Phil Scherer, transportation Planner, Northwest Wisconsin Regional Planning Commission.

Pavement Surface Evaluation and Rating Presentation

Accurate PASER ratings depend on the judgment of the raters. Every year raters are required to attend PASER training and review the rating criteria. Various types of pavement distress are shown and there is a discussion on how various types of distress contribute to the appropriate rating for each road segment.

Pavement Surface Evaluation and Rating (PASER) Training

The Pavement Surface and Evaluation Rating (PASER) system was developed by the University of Wisconsin-Madison Transportation Information Center to be used as the State of Wisconsin's standard road rating system. PASER is a "windshield" road rating system that uses a 1 to 10 rating scale, with a value of 10 representing a new road and a value of 1 representing a failed road.

PASER | Barry County Road Commission
