The Physical Property fields include properties such as vapor pressure and boiling point, as well as explosive limits and toxic exposure thresholds The information in CAMEO Chemicals comes from a variety of data sources.

FURFURAL

Physical properties of furfural Furfural is formed by dehydrating five-carbon sugars such as xylose and arabinose that can be obtained from the hemicellulose fraction of lignocellulosic biomass. More than one reaction mechanism has been proposed in different studies based on different techniques and under different reaction conditions.

Furfural has an aromatic odor reminiscent of almonds. Its exceptional physical properties make from this hetero-aromaticaldehyde a selective solvent for refining lubricating oils. In the manufacture of resin-bonded grinding wheels and refractory materials this biomass based chemical is used at the same time as a reactive chemical and as solvent.

To get started finding Physical Properties Of Furfural Ifc Supplier In , you are right to find our website which has a comprehensive collection of manuals listed. Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Physical Properties Of Furfural Ifc Supplier In ...

Furfural is an organic compound with the formula C₄H₃OCHO. It is a colorless liquid, although commercial samples are often brown. It has an aldehyde group attached to the 2-position of furan. It is a product of the dehydration of sugars, as occur in a variety of agricultural byproducts, including corncobs, oat, wheat bran, and sawdust.
