To fix this, access your browser's Preferences and enable pop-ups. If possible, simply enable them for The Physics Classroom website. On most systems and in most browsers, MOP considers the answer "a" to be the same as the answer "A". And so it should not matter whether or not capital letters are used in the answer box.

### **Technical Matters - Problems, Solutions, ect.**

Answer:  $\sim 36$  kg. The mass of an object is related to weight by the equation  $W = m \cdot g$  where  $g = \sim 10$  m/s/s on Earth and one-sixth this value ( $\sim 1.67$ ) on the moon. So if Billy weighs 360 N on Earth, then his mass is approximately  $\sim 36$  kg. His mass on the moon will be the same as his mass on Earth.
