If you are thinking about installing hip roof trusses at your house then you need to add some extra care. Hip roof trusses are commonly used in areas of heavy rain because they prevent water from draining into a room because they have a fixed angle for pitch and slope downward at every point. You simply have to follow these instructions to initiate an easy process:

Installing roof trusses - myroof.com

A Dutch hip roof is a combination of both the hip roof and gable roof features. It is sometimes also referred to as a Dutch gable roof, precisely because it contains both roof style features. The gable portion of a Dutch hip roof is usually placed at the end of the roof ridge and sits on top of the plane of the hip roof.
